OPENING REMARKS AT APCAEM REGIONAL SEMINAR ON POST-HARVEST TECHNOLOGY OF MAJOR CROPS:		1-8
Chinese Academy of Engineering	<i>Jia-yi Cheng</i>	1-2
Agricultural Department, Yunnan Province	<i>Chun-lin Long</i>	3-4
United Nations ESCAP	<i>Ravi Ratnayake</i>	5-6
APCAEM	<i>Tapio Juokslahti</i>	7-8
I	FOOD SAFETY ISSUES IN FOOD TRADE	9-11
	<i>Tapio Juokslahti</i>	
A.	Introduction	9
B.	Food safety	9
C.	WTO sanitary and phyto-sanitary agreement (SPS)	10
D.	Food safety implications for trade	10
E.	Case of Thailand: World kitchen	11
F.	Case of Finland: From field to table	11
II	POTATO PRODUCTION, POST-HARVEST UTILIZATION AND ITS IMPLICATIONS FOR EMPLOYMENT IN THE RURAL SECTORS OF ASIAN COUNTRIES	12-31
	<i>Yi Wang</i>	
	Abstract	12
A.	Introduction on potato production	13
B.	Constraints for potato production and post-harvest utilization	13
C.	Potato post-harvest utilization	18
D.	Potato post-harvest technology	19
E.	Potato post-harvest and rural employment	21
F.	Conclusions and recommendations	23
	References	25

	Appendix	27
III	POST-HARVEST TECHNOLOGY FOR EMPLOYMENT GENERATION IN RURAL BANGLADESH	32-47
	<i>M.A. Mazed</i>	
	A. Bangladesh economy and agriculture	32
	B. Agro-business as linked with post-harvest technology	32
	C. Human nutritional status in Bangladesh	34
	D. Poverty alleviation: A national priority agendum	34
	E. Post-harvest technology of major crops	35
	F. Post-harvest technology in food production and employment generation	43
	G. Conclusions	44
	H. Recommendations	45
	References	47
IV	POST-HARVEST PROCESSING TECHNOLOGY OF SWEET POTATOES IN SICHUAN, CHINA	48-61
	<i>He-ning Liu</i>	
	Abstract	48
	A. Introduction	49
	B. Sweet potato post-harvest technology development	49
	C. Sweet potato post-harvest utilization mode “company plus farmers”	52
	D. Sweet potato starch extracting technology	53
	E. Suggestions for improvement on sweet potato processing	58
	References	61
V	POST-HARVEST TECHNOLOGY FOR EMPLOYMENT GENERATION IN RURAL SECTOR OF INDIA	62-105
	<i>Nawab Ali</i>	
	Abstract	62
	A. Introduction	64

	B. Scope, importance, and the role of post-harvest technology	65
	C. Processing and value addition	67
	D. Agricultural processing	69
	E. Rural-based agro-processing	76
	F. Status of post-harvest technology and agro-processing industry	77
	G. Post-harvest technology research and infrastructure - SWOT analysis	84
	H. Priority in post-harvest technology research and development	85
	I. Post-harvest technology for employment and income generation	87
	J. Role of women in post-harvest technology and income generation	93
	K. Recommendations	103
	References	104
VI	ASSESSMENT OF MILLING RATIO-RELATED TO FOOD SECURITY IN INDONESIA	106-115
	<i>Uning Budiharti</i>	
	Abstract	106
	A. Introduction	107
	B. General situation of agriculture in Indonesia	108
	C. Shifting in rice milling system	111
	D. Configuration of rice milling system	113
	E. Conclusions	114
	References	115
VII	CROP PRODUCTION AND THE STATUS OF POST-HARVEST INDUSTRY OF ISLAMIC REPUBLIC OF IRAN	116-123
	<i>Ali Asghar Shivaiei</i>	
	A. The country in brief	116
	B. Cultivated area of agricultural and orchard crops	116
	C. Food security and minimizing post-harvest losses	118

	D. Main objectives	118
	E. Policies and strategies	121
	F. Summary of food and post-harvest industries status	121
	References	123
VIII	POST-HARVEST TECHNOLOGY OF MAJOR CROPS IN NEPAL	124-137
	<i>Khadga B. Shrestha</i>	
	A. Introduction	124
	B. Socio-economic status	124
	C. Agricultural status	125
	D. Food situation	125
	E. Post-harvest technology	126
	F. Major issues	128
	G. Summary and conclusions	129
	References	130
	Appendix	133
IX	POST-HARVEST TECHNOLOGY FOR VARIOUS CROPS OF PAKISTAIN: CURRENT STATUS, EMPLOYMENT GENERATION AND PROSPECTS	138-152
	<i>Munir Ahmad</i>	
	Abstract	138
	A. Introduction	139
	B. Present status of post-harvest processing	140
	C. Constraints faced by post-harvest industry	145
	D. Government policies and strategies towards post-harvest processing	146
	E. Post-harvest technology and employment generation	146
	F. Future prospects	148
	G. Conclusions and recommendations	149

	References	151
X	POST-HARVEST TECHNOLOGY IN THE PHILIPPINES <i>Susana G. Castro</i>	153-162
	Abstract	153
	A. Introduction	153
	B. Post-harvest situations	154
	C. Post-harvest technologies in the Philippines	158
	D. Implications of post-harvest technology for employment generation in the rural sector	161
	E. Conclusions and recommendations	161
	References	162
XI	POST-HARVEST MANAGEMENT TECHNOLOGIES AND POLICY ON AGRICULTURAL PRODUCTS IN THE REPUBLIC OF KOREA <i>Cho Kwang Hwan</i>	163-172
	Abstract	163
	A. Introduction	163
	B. Status of post-harvest management system	164
	C. Post-harvest management technology	165
	D. Policy proposals for post-harvest management	170
	E. Conclusions	171
	References	172
XII	POST-HARVEST RESEARCH AND DEVELOPMENT IN VIET NAM <i>Nguyen Duy Lam</i>	173-186
	A. Introduction	173
	B. General information on the post-harvest situation	176
	C. Post-harvest research in Viet Nam	179
	D. Recommendations and priorities for research and development	184

LIST OF CHARTS

4.1	Three stages of sweet potato production (Sichuan)	50
4.2	Calculated income from 100 kg of sweet potato (yuan)	51
6.3	Flowchart of assessment of milling ratio	114

LIST OF FIGURES

5.1	Flow diagram of value addition to the harvested biomass of plant and animal origin	68
5.2	Process flow chart and mass balance for making pigeonpea dal (improved process)	73
6.1	Population trend	109
6.2	Production of main crops	110
10.1	Breakdown of post-harvest losses in rice	156
10.2	Breakdown of post-harvest losses in corn	156
11.1	Post-harvest management system	165
11.2	Basic processing steps in RPC	166

LIST OF TABLES

2.1	Major potato producers in the world, 2001	27
2.2	Potato production, growth rate in major potato producing countries in Asia, 2001	27
2.3	Potato production, growth rate in 1993 and its projection to 2020	27
2.4	Potato consumption, growth rate in 1993 and its projection to 2020	28
2.5	Imports of frozen potato fries into ESCAP countries, 2000	28
2.6	Usage and consumption of worldwide potatoes, 1994-1996	28
2.7	Trading of worldwide potatoes, 1999	29
2.8	Trading of worldwide frozen potatoes, 1999	30
2.9	Agro-enterprise, its employment and production value, 1998-2002	30
2.10	Employment effects of sweet potato starch and noodle processing in China by scale of enterprise	31
2.11	Aggregate employment in sweet potato and potato starch / noodle processing enterprises in China, 1997	31
3.1	Dietary pattern in Bangladesh compared to the desirable dietary pattern	34
4.1	Statistics of sweet potato production in Sichuan, 1952-2000	49
4.2	Variety of starch produced in China, 2000	51
4.3	Production capacity of the major factories in Sichuan	53
4.4	Specifications and estimated investment for equipments	54
4.5	Performance, specifications and estimated investment	55
4.6	Main technical parameters and investment calculation of equipments	57
4.7	Main equipments and investment calculation	57
4.8	Main parameters and investment calculation	58
5.1	Indian rural and urban population during the 20 th century and beyond	64
5.2	Production of plant and animal origin major food commodities in India, 2002-2003	65

5.3	Production and productivity of food grains in India during the last 50 years	66
5.4	Production of different food commodities and their estimated post-harvest losses in India	67
5.5	Present status and future projections of some of the post-harvest equipments in India	69
5.6	Some of the conventional and improved post-harvest and agro-processing operations	70
5.7	Average output of raw and parboiled rice in various milling units/system	71
5.8	Husk content, the maximum possible dal yield from some of the selected pulses grown in India	72
5.9	Some of the major post-harvest technologies and equipments developed in India	77
5.10	Present use and suggested diversification of field crops for better domestic utilization and export promotion	86
5.11	Government (Central/State) and NGO-sponsored schemes/projects for employment generation in India	92
5.12	Women-friendly food products and technology in Asia and the Pacific countries identified /developed under the aegis of RNAM/ESCAP	95
5.13	List of some of post-harvest machines and food-processing tools and equipments identified under the aegis of RNAM/ESCAP	96
6.1	Land and population distribution by major islands, 1995	109
6.2	Land use in agriculture	110
6.3	Harvest area, production and rice imports	112
6.4	Comparison of the rice quality from SRM and MRM	113
6.5	Rice milling configuration vs. milling quality	113
7.1	Size of land holding	116
7.2	Cultivated crops in 2002	117
7.3	Orchard crops in 2002	117
7.4	Estimation of orchard post-harvest (thousand tons)	119
7.5	Estimation of crop production by post-harvest industries (thousand tons)	120
7.6	Investment and employment of food and beverage industries, 1997-2001	121
7.7	Improvement and employment status of food and agricultural produce processing industries by types, 2001	122
7.8	Number, employment and credits of the rural industries region, 2001	122
8.1	Agricultural status in Nepal	133
8.2	Pre-storage loss of food grains	134
8.3	Percentage loss of food grains in all structures	134
8.4	Percentage loss in various structures	135
9.1	Fruits and vegetables production in Pakistan	143
10.1	The Philippine agricultural performance from Jan. to Dec. 2001	155
11.1	Number of RPCs and DSCs per year	166
11.2	Comparisons of cost and labor time in rice processing between RPC and individual farm	167

11.3	APC installation status (2001)	168
11.4	Various grader and their applications	169
11.5	Major horticultural crops handled in the APC	170
ANNEX		187-194
	I. Programme	187
	II. List of participants	190
	III. SWOT data analysis	194
