UNECE at a glance
Membership and focus

➢ The only UN Regional Commission with a mandate in developing agricultural quality standards

➢ Open for participation by all UN Member States

• Set up in 1947 by ECOSOC

• Aim is to promote pan-European economic integration through
  o Policy dialogue
  o Normative work
  o Technical cooperation

• 56 member States in Europe, North America, the Caucasus, Central Asia and Western Asia

• 17 “programme” countries

• 18 landlocked and 2 double landlocked countries

• More than 100 countries beyond the UNECE region benefit from its work
UNECE Working Party on Agricultural Quality Standards (WP.7)

Structure, focus and related work

Organization:
- Working Party + 4 Specialized Sections
- 5 annual intergovernmental meetings
- Open to all UN member States
- Serviced by the Economic Cooperation and Trade Division (ECTD)

Over 100 commercial quality standards:
- Fresh fruit and vegetables, nuts and dried fruit, seed potatoes, meat, eggs
- Open development and adoption process, regular revisions, inputs from parties
- Complemented with guidance materials, illustrative posters and leaflets, code mark registry, etc.

Quality helps:
- Increase benefits from international trade
- Prevent food loss

Related work:
- Food loss and waste
- Capacity building
- Illustrated guides
- Studies

Used by:
- Authorities – check products against a set of transparent rules
- Producers – improve production, reach new markets
- Traders & Retail Chains – order confidently
Standards provide a “common trading language” used by industry to describe attributes of the commodity being sold.

They provide the terms of reference for ensuring the business transaction.

Quality at every stage
How agricultural quality standards facilitate trade

- Provide a common trading/transaction language for all participating parties along the value/supply chain
- Define common minimum quality requirements, thus facilitating transactions
- Allow a transaction without prior visual inspection of the goods
- Help traders order with confidence, knowing they will get the quality of the produce they expect
- Serve as the basis for pricing
- Increases profitability of high-quality produce
- Build confidence and competitiveness on a market
- Prevent placement and sale of low-quality sub-standard products on a market
- Enables groups of producers to combine their produce to larger lots and better serve the market
- Support market development and market access
- Reduce food loss and waste
The scope of UNECE standards

SCOPE:
• Apply to produce intended for direct consumption, or for food when intended to be mixed with other products for direct consumption without further processing.
• Does not apply to produce intended for industrial processing.

UNECE’s standards and guides go through a trial phase and consultative process

Result:
• Including industry concerns helps develop standards that reflect trading practices, rather than normative ideals of what the product requirements should be.
• Increased use of standards by industry
How are ECE standards developed?

Demand-driven, inclusive and open development and adoption process

- Standards are developed on request from countries – any UN Member State
- All UN member countries participate with the same rights
- Input comes from all parties involved (public and private; producing and importing countries) at all stages (development and evaluation before standards are adopted).
- Cooperation with all other international organizations
- Flexible, interactive, responsive process (revisions when needed)
- Standards are adapted to reflect emerging varieties or changing producing, marketing, trading and regulatory conditions
- Decisions are taken on a consensus basis
The development of a standard

Specialized sections develop a draft standard => recommend for adoption or trial => upon agreement to WP.7 for approval

ADOPTION by WP.7 (or back to Specialized Section)
Role and impact of UNECE standards

From voluntary to binding

UNECE STANDARD

GOVERNMENT
- National standard

EU
- EU regulation

OECD
- Explanatory brochures

PRIVATE SECTOR
- Reference in contracts
• UNECE Standards are enshrined in European Union (EU) legislation

• EU harmonizes its standards with UNECE standards for key agricultural products

• For 10 products – compulsory use of EU Specific Marketing Standards (fully harmonized with UNECE standards):
  • Apples, Citrus fruit, Kiwifruit, Lettuce, Peaches and Nectarines, Pears, Strawberries, Sweet peppers, Table grapes, Tomatoes.

• For other fruits and vegetables, traders can either use the EU General Marketing Standard OR the equivalent UNECE standard
# Progress over the past 5 years

**Adoption of UNECE standards and guidance**
